

Broadcasting Decision CRTC 2005-215

Ottawa, 25 May 2005

1311831 Ontario Limited
North Bay, Ontario

Application 2005-0303-8

CKTR-FM North Bay – Technical change

1. The Commission **approves** the application by 1311831 Ontario Limited to change the authorized contours of the radio programming undertaking CKTR-FM North Bay, by increasing the effective radiated power from 31 watts to 50 watts, by increasing the antenna height and by relocating the transmitter.
2. These technical amendments will cause no significant change to the contours.
3. The Department of Industry (the Department) has advised the Commission that, while this application is conditionally technically acceptable, it will only issue a broadcasting certificate when it has determined that the proposed technical parameters will not create any unacceptable interference with aeronautical NAV/COM services.
4. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.
