

Broadcasting Decision CRTC 2005-52

Ottawa, 14 February 2005

Natotawin Broadcasting Inc.
Prince Albert, Saskatchewan

Application 2004-0484-8
Broadcasting Public Notice CRTC 2004-81
3 November 2004

CJLR-FM La Ronge and its transmitter CJLR-FM-3 Prince Albert – Technical change

1. The Commission **approves** the application by Natotawin Broadcasting Inc. (Natotawin) to change the authorized contours of its transmitter CJLR-FM-3 Prince Albert, by increasing the effective radiated power from 50 watts to 249 watts, and by decreasing the antenna height from 40 metres to 21 metres.
2. The Commission received one intervention in support of this application.
3. As a result of the technical amendments approved in this decision, CJLR-FM-3's status will change from that of a low-power unprotected service to a regular class A1 FM station.
4. The Department of Industry (the Department) has advised the Commission that, while this application is conditionally technically acceptable, it will only issue a broadcasting certificate when it has determined that the proposed technical parameters will not create any unacceptable interference with aeronautical NAV/COM services.
5. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.

Secretary General
