

Broadcasting Decision CRTC 2005-602

Ottawa, 21 December 2005

Standard Radio Inc.
Edmonton, Alberta

Application 2005-0708-0
Broadcasting Public Notice CRTC 2005-99
28 October 2005

CFBR-FM Edmonton – Technical change

1. The Commission **approves** the application by Standard Radio Inc. to change the authorized contours of its transmitter CFBR-FM Edmonton, by increasing the average effective radiated power (ERP) from 64,000 watts to an ERP of 100,000 watts, by increasing the antenna height and by relocating the transmitter.
2. The Commission did not receive any interventions in connection with this application.
3. The Department of Industry (the Department) has advised the Commission that, while this application is conditionally technically acceptable, it will only issue a broadcasting certificate when it has determined that the proposed technical parameters will not create any unacceptable interference with aeronautical NAV/COM services.
4. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.

Secretary General
