

Broadcasting Decision CRTC 2006-271

Ottawa, 30 June 2006

Radio Anticosti inc.

Port-Menier (Île d'Anticosti), Quebec

Application 2005-1336-8

Broadcasting Public Notice CRTC 2006-52

25 April 2006

CJBE-FM Port-Menier (Île d'Anticosti) – Technical change

1. The Commission **approves** the application by Radio Anticosti inc. to amend the broadcasting licence for the radio programming undertaking CJBE-FM Port-Menier (Île d'Anticosti), in order to change the frequency from 90.1 MHz (channel 211LP) to 90.5 MHz (channel 213A). The Commission also **approves** the application by Radio Anticosti inc. to change the authorized contours by increasing the average effective radiated power from 6¹ watts to 88 watts, by decreasing the antenna height and relocating the transmitter.
2. Radio Anticosti inc. indicated that it wishes to expand its authorized contours in order to better serve its audience, which is concentrated in the city of Port-Menier during the winter season and spread out in the surrounding areas during the summer season.
3. The Commission notes that the increase in power will result in a change in CJBE-FM's status from that of a low-power, unprotected service to that of a regular, Class A service.
4. The Commission received one intervention in support of this application.
5. The Department of Industry (the Department) has advised the Commission that, while this application is conditionally technically acceptable, it will only issue a broadcasting certificate when it has determined that the proposed technical parameters will not create any unacceptable interference with aeronautical NAV/COM services.

¹ According to the broadcasting certificate issued by the Department of Industry, the average effective radiated power of this undertaking is 6 watts and not 16 watts, as noted in Broadcasting Public Notice CRTC 2006-52, 25 April 2006.

6. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.

Secretary General
