**Application No. 2007-0076-7**

Application by **CJNE FM Radio Inc.** to amend the licence of the radio programming undertaking CJNE-FM Nipawin, Saskatchewan.

The licensee proposes to add an FM transmitter at Tisdale to broadcast the programming of CJNE-FM Nipawin, in order to adequately serve the population of Tisdale.

The transmitter would operate on frequency 95.7 MHz (channel 239LP) with an effective radiated power of 45 watts (non-directional antenna/antenna height of 28.6 metres).

The licensee indicates that it wishes to strengthen its signal in Tisdale and surrounding low-lying areas.

Industry Canada has informed the Commission that the licensee has revised its originally proposed technical parameters since the frequency 103.1 MHz (channel 276LP) is not available for low-power use in Tisdale.

The Commission has therefore revised the above-noted technical parameters accordingly.
