

Broadcasting Decision CRTC 2005-217

Ottawa, 26 May 2005

Community Radio Society of Saskatoon Inc.
Saskatoon, Saskatchewan

Application 2005-0043-0
Broadcasting Public Notice CRTC 2005-27
31 March 2005

CFCR-FM Saskatoon – Technical change

1. The Commission **approves** the application by Community Radio Society of Saskatoon Inc. to change the authorized contours of the radio programming undertaking CFCR-FM Saskatoon, by increasing the effective radiated power from 180 watts to 1,480 watts, by increasing the antenna height, and by relocating the transmitter.
2. The licensee indicated that the proposed change would increase the quality of CFCR-FM's signal.
3. The Commission did not receive any interventions in connection with this application.
4. The Department of Industry (the Department) has advised the Commission that, while this application is conditionally technically acceptable, it will only issue a broadcasting certificate when it has determined that the proposed technical parameters will not create any unacceptable interference with aeronautical NAV/COM services.
5. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.
