

## Broadcasting Decision CRTC 2005-250

Ottawa, 16 June 2005

### **Standard Radio Inc.**

Terrace and Kitimat, British Columbia

*Application 2005-0173-5*

*Broadcasting Public Notice CRTC 2005-32*

*15 April 2005*

### **CJFW-FM Terrace and its transmitter CJFW-FM-1 Kitimat – Technical changes**

1. The Commission **approves** the application by Standard Radio Inc. (Standard), the licensee of the radio programming undertaking CJFW-FM Terrace, to change the authorized contours of its transmitter CJFW-FM-1 Kitimat, by increasing the effective radiated power from 50 watts to 170 watts, by decreasing the antenna height and by relocating the transmitter. Standard stated that the current tower is being dismantled.
2. The Commission did not receive any interventions in connection with this application.
3. The Commission notes that the authorized contour of the transmitter will increase significantly as a result of the technical changes approved in this decision and that CJFW-FM-1's status will change from that of a low-power unprotected service to that of a regular Class A1 transmitter.
4. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department of Industry notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.

Secretary General
