

## Broadcasting Decision CRTC 2005-252

Ottawa, 21 June 2005

**Standard Radio Inc.**  
Winnipeg, Manitoba

*Application 2005-0070-4*  
*Broadcasting Public Notice CRTC 2005-32*  
*15 April 2005*

### **CKMM-FM Winnipeg – Technical changes**

1. The Commission **approves** the application by Standard Radio Inc. to change the authorized contours of the radio programming undertaking CKMM-FM Winnipeg, by decreasing the average effective radiated power from 100,000 watts to 70,000 watts, by increasing the antenna height to 206.1 metres and by relocating the transmitter.
2. The Commission did not receive any interventions in connection with this application.
3. The Commission notes that the contour of the station will increase as a result of the technical changes approved in this decision.
4. The Department of Industry (the Department) has advised the Commission that, while this application is conditionally technically acceptable, it will only issue a broadcasting certificate when it has determined that the proposed technical parameters will not create any unacceptable interference with aeronautical NAV/COM services.
5. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, this authority will only be effective when the Department notifies the Commission that its technical requirements have been met, and that a broadcasting certificate will be issued.

Secretary General
