In accordance with the framework set out in *Regulatory framework for the licensing and distribution of high definition pay and specialty service*, Broadcasting Public Notice CRTC [2006-74](#), 15 June 2006, programming on the analog service and on the upgraded service will be comparable, that is, not less than 95% of the video and audio components will be the same, exclusive of the commercial messages and of any part of the service carried on a subsidiary signal. **Application No. 2008-0358-7**

Application by **Radio communautaire du Saguenay inc.** relating to the licence of the French-language community type B radio programming undertaking CKAJ-FM Saguenay, Quebec.

The licensee proposes to change the authorized contours of its transmitter CKAJ-FM-1 at La Baie by increasing the effective radiated power from 2,693 watts to 14,164 watts, by increasing the effective antenna height and by relocating the antenna (non-directional antenna/effective antenna height 141.5 metres).

The licensee indicated that these changes will offer improved quality of broadcast of the signal of CKAJ-FM Saguenay.

The Commission notes that the authorized contours of CKAJ-FM-1 La Baie will be changed significantly resulting from the above proposed technical changes.
