1. **Alliston, Ontario**
Application No. 2009-0318-9

Application by **2188301 Ontario Corporation**, to amend the technical parameters of the English-language low power FM commercial radio programming undertaking CFAO-FM Alliston.

The applicant proposes to amend the technical parameters by reducing its effective antenna height above average terrain from 48.4 metres to 25.9 metres and by relocating its transmitter half a kilometre away from the original site.

The applicant states that these changes are necessary because the antenna site it initially proposed is unavailable. Furthermore, the applicant has indicated that the changes of its authorized contours will be minimal.

2. **Edmonton, Alberta**
Application No. 2009-0354-3

Application by **Rawlco Radio Ltd.** to amend the antenna's radiation pattern of the new English-language commercial FM radio programming undertaking to serve Edmonton.

The applicant proposes to modify the authorized contours to provide better coverage to the southern parts of Edmonton. The applicant proposes to employ an antenna with a different radiation pattern which will shift the contours slightly to the southeast. All technical parameters remain the same.

According to the applicant, such a modification would have a very limited impact on the estimated population reached by the station's signal. The Commission notes that this modification will see a decrease in population from 998,500 to 983,663 for its 3 mV/m contour and an increase in population from 1,069,000 to 1,070,681 for its 0.5 mV/m contour.
