

Broadcasting Decision CRTC 2009-208

Route reference: 2009-81

Ottawa, 22 avril 2009

OasisHD Inc.
Across Canada

Application 2009-0248-8, received 30 January 2009

Oasis HD – Licence amendment

1. The Commission **approves** the application by OasisHD Inc. to amend the broadcasting licence for the national, English-language Category 2 high definition (HD) specialty programming undertaking known as Oasis HD to allow the service to be made available for distribution in standard definition (SD) format. The Commission did not receive any interventions in connection with this application.
2. The licensee indicated that its application is in accordance with the Commission's long-standing "technology-neutral" approach to licensing and that it is also consistent with the spirit and intent of the Commission's policies set out in Broadcasting Public Notices 2006-74 and 2008-100. The terms and conditions for distribution of the SD version of Oasis HD will be negotiated with the broadcasting distribution undertakings.
3. Accordingly, by **condition of licence**, the licensee is authorized to make available for distribution, until the end of its current licence term, a version of Oasis HD in standard definition format, provided that not less than 95% of the video and audio components of the high and standard definition versions of the service are the same, exclusive of commercial messages and any part of the specialty service carried on a subsidiary signal.
