Application No. 2009-1556-4

1. Alma, Quebec **Application No. 2009-1637-2**

Application by **Groupe Radio Antenne 6 inc.** relating to the new French-language FM commercial radio programming undertaking CFGT-FM Alma, Quebec approved in *CFGT Alma – Conversion to FM band and CHRL-FM Roberval – Technical change*, Broadcasting Decision CRTC 2009-507, 20 August 2009 (Broadcasting Decision 2009-507).

The applicant proposes to use the frequency 104.5 MHz (283B) instead of 97.7 MHz (249B) as originally approved in Broadcasting Decision 2009-507.

The applicant submits that this change has become necessary due to constraints related to the use of the 97.7 MHz frequency in the Alma market and the potential problems if it were to use this frequency.

2. Calgary, Alberta
Application No. 2009-1556-4

Application by **Canwest Television GP Inc. (the general partner) and Canwest Media Inc. (the limited partner), carrying on business as Canwest Television Limited Partnership** relating to the broadcasting licence for the English-language transitional digital television undertaking CICT-DT Calgary, Alberta.

The licensee proposes to implement CICT-DT by changing its authorized contours by increasing the average effective radiated power (ERP) from 3,200 to 50,000 watts, by modifying the antenna radiation pattern from directional to non-directional, by increasing the effective height of the antenna above average terrain from 51 to 378 meters and by relocating the antenna site.

The licensee notes that because tower space is limited in the Calgary area, moving its antenna and increasing the ERP would enable it to provide four times the coverage of its current transitional antenna located at the CICT-DT station.
