Ottawa, 23 July 2010

RNC Media Inc.

Rouyn-Noranda and Val d'Or, Quebec

Application 2010-0643-7, received 14 April 2010

CKRN-TV Rouyn-Noranda – Licence amendments

1. The Commission **approves** the application by RNC Media Inc. to amend the broadcasting licence for the television programming undertaking CKRN-TV Rouyn-Noranda in order to add a digital transmitter in Rouyn-Noranda (CKRN-DT) and a digital rebroadcasting transmitter in Val d'Or (CKRN-DT-1), to simultaneously broadcast existing analog programming. The licensee submitted that the proposed amendments would allow it to adequately serve the populations of Rouyn-Noranda and Val d'Or. The Commission did not receive any interventions in connection with this application.
2. The new transmitter in Rouyn-Noranda will operate on channel 9 with an average effective radiated power (ERP) of 9,096 watts (maximum ERP of 19,000 watts with an effective height of antenna above average terrain [EHAAT] of 219.6 metres).
3. The new rebroadcasting transmitter in Val d'Or will operate on channel 7 with an average ERP of 16,200 watts (maximum ERP of 21,500 watts with an EHAAT of 201.1 metres).
4. In *Revised licensing framework for over-the-air digital television services*, Broadcasting Regulatory Policy CRTC 2010-69, 10 February 2010, the Commission stated that it would not issue separate licences for digital television transmitters. Instead it would authorize the operation of digital transmitters by way of an amendment to the existing licence that would allow the simulcast of the associated service's programming on a digital transmitter. In light of the Commission's determinations set out in that policy, the Commission has considered this application as an amendment to the existing licence.
5. The Commission reminds the licensee that, pursuant to section 22(1) of the *Broadcasting Act*, the licence amendments will not be in effect until the Department of Industry notifies the Commission that its technical requirements have been met and that a broadcasting certificate has been issued.

6. The transmitters must be operational at the earliest possible date and in any event no later than 31 August 2011, unless otherwise authorized by the Commission.

Secretary General

**This decision is to be appended to the licence.*
