CISC Network Working Group – Non-consensus report on quality of service metrics to define high-quality fixed broadband Internet access service

Correction

1. In *CISC Network Working Group – Non-consensus report on quality of service metrics to define high-quality fixed broadband Internet access service*, Telecom Decision CRTC 2018-241, 13 July 2018 (Telecom Decision 2018-241), the Commission inadvertently omitted reference to Calgary in its definition of Tier 1 cities.
2. Accordingly, footnote 6 of Telecom Decision 2018-241 is amended to read as follows (change highlighted in bold):

⁶ The current Tier 1 cities, based on the consensus recommendation in the NTWG Report, are Moncton, Halifax, Toronto, Ottawa, Montréal, Winnipeg, Saskatoon, **Calgary**, Edmonton, and Vancouver.

Secretary General
