<sup>2</sup> The cited policy objective is: 7(c) to enhance the efficiency and competitiveness, at the national and international levels, of Canadian telecommunications.

4. In accordance with the 2019 Policy Direction,<sup>3</sup> the Commission considers that this order, which is based on a complete record, can promote competition, affordability, consumer interests, and innovation. Specifically, the approval of these applications will promote (i) competition, because it will give carrier Internet service providers access to copper in-building wire in multi-dwelling units on the same basis as registered local exchange carriers; and ii) innovation, because it will ensure that competitors have access to high-quality telecommunications services.
5. Revised tariff pages are to be issued within 10 calendar days of the date of this order. Revised tariff pages can be submitted to the Commission without a description page or a request for approval; a tariff application is not required.
